

**ENGR 1112**  
**Fall 2007**

**HW#10 – Library Assignment #2 -- Due Tues. Dec. 4, 2007 by class-time**

Please find an engineering article of your choosing from the Chambers Library (online is OK too) and write a two page summary of the article.

The article should be about an engineering topic of interest to you, but should also contain some discussion of how this engineering topic relates to society in general – e.g. how is society potentially affected by this area of engineering.

The summary should be grammatically correct and spell-checked. The summary should also reflect a good understanding of the article. To this end please choose an article that is not too high a level for you. Printed versions of your assignment should be turned in at class-time on Dec. 4, 2007.

Make sure and use proper reference styles as shown in:
