

ENGR 1112
Fall 2007

HW#8 -- Ethics -- Due Tues. Nov. 20, 2007 by class-time

Review the following:

[UCO Code of Student Conduct](#).

[NSPE Code of Ethics](#).

[National Institute for Engineering Ethics \(NIEE\)](#). Ethics violations cases.

Find two engineering ethics cases from the [NIEE web-site](#). For each of the two cases write **two paragraphs**. The first paragraph should summarize the case and the resolution. The second paragraph should include an ethics analysis of the case. It is VVI (very very important) that your analysis is done from the perspective of the NSPE Code of Ethics by stating specific *Canons, Rules of Practice, or Professional Obligations* referencing the exact part of the code from which your reasoning derives. It is also very important not to judge the case only by your personal ethics -- please stick to the Code of Ethics.

Please format these into a Word document and bring to class on Nov. 20.
