

Thermal Fluid Engineering II Project Spring 2008

The project this semester is to complete the design problem from the textbook – Prob. D6.2 on pp. 445-446. The result of the project will be a written report following the standard ASME format for papers. Using the links on the course web-site you can look up this format. There is also a report template on the course web-site.

The deadline for the report is **May 7, 2008 at 11:59 p.m.** The reports should be a “pdf.” If you do not have Adobe Acrobat to make pdf’s then you may use either of the following software to create one:

1. Primopdf (<http://www.primopdf.com/>)
2. OpenOffice.org (<http://www.openoffice.org/>)

We will discuss details of the project in class as time permits.
